Professional Summary

Final-year Computer Science student with strong foundations in Data Structures, Algorithms, and Backend Development. Built full-stack applications using Java, Spring Boot, Node.js, and REST APIs, integrating PostgreSQL, MongoDB, JWT authentication, and role-based access control. Skilled in designing clean, layered backend architectures and debugging production-level issues for reliability and performance. Seeking a Backend Engineer Internship to contribute to real-world, scalable systems.

Education

Chitkara University Aug 2023 – Present
Bachelor of Engineering in Computer Science (CGPA: 7.90) Punjab, India

Projects

StudySmartAI – AI-Powered Learning Platform (React, FastAPI, MongoDB, Gemini AI) GitHub

- Developed a full-stack AI-powered learning platform using React and FastAPI for document-based personalized study and interview preparation.
- Built RESTful APIs with FastAPI and MongoDB for user, document, learning session, and progress management.
- Implemented JWT-based authentication, protected routes, secure password hashing, and email verification/password reset workflows.
- Integrated Gemini API for AI-generated learning content and practice questions, with PDF/DOCX text extraction and Cloudinary-based document storage.

CarCare – Vehicle Maintenance System (Java, Spring Boot, PostgreSQL) GitHub

- Developed a backend-driven vehicle maintenance management system using Java and Spring Boot with CRUD operations and RESTful APIs.
- Designed a layered backend architecture using Controllers, Services, and Repositories for clean code organization.
- Integrated PostgreSQL for vehicle records, service history, and maintenance tracking.
- Tested REST APIs using Postman and validated backend workflows to improve application reliability.

MediConnect – Healthcare Appointment System (React, Node.js, Express.js, MongoDB) GitHub

- Developed a full-stack healthcare appointment platform with separate dashboards for doctors and patients.
- Implemented JWT-based authentication and role-based authorization for secure access control.
- Designed RESTful APIs for doctor discovery, appointment booking, appointment management, and prescription workflows.
- Built appointment scheduling and doctor availability management with safeguards against double bookings.

Technical Skills

Programming Languages: Java, JavaScript, HTML, CSS
Frameworks Technologies: Spring Boot, Node.js, Express.js, React.js, REST APIs
Databases: PostgreSQL, MySQL, MongoDB
Developer Tools: Git, GitHub, Maven, Postman, IntelliJ IDEA, VS Code
DevOps Cloud: AWS (EC2, S3), Linux, Docker, Jenkins, CI/CD, Nagios
Core CS: Data Structures Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Certifications

- Meta Full Stack Developer Specialization
- Effective Communication Specialization
- Foundations of Cybersecurity
- Certified Devops Associate
- Introduction to Python

Achievements

- Solved 400+ LeetCode problems covering arrays, strings, trees, graphs, and Dynamic Programming.
- Built multiple backend and full-stack applications using Spring Boot, Node.js, Express.js, React, PostgreSQL.
- Continuously improving problem-solving and system design skills for software engineering roles.
